## Failure to Appear in Court Warrants

### COURT / DEPARTMENT / DIVISION

This procedure is to be used by District Court, Magistrate Court and Metropolitan Court staff when creating a warrant in Odyssey.

### USER

All court staff with rights to create warrants.

### INTRODUCTION

This SOP will cover the process for issuing manual or automated Failure to Appear in Court (FTA) Bench Warrants. Some District and Magistrate courts submit automated warrants (warrants that are submitted electronically through Odyssey) to the Department of Public Safety (DPS) so throughout this SOP, **additional instructions for automated warrants will be notated in purple**. If warrants are not submitted electronically to DPS, users may ignore the instructions in purple.

This SOP instructs users on how to create warrants through the warrants tab. Some District Courts receive warrants through File & Serve and/or the warrant is created and submitted by the District Attorney's Office. For those courts, users will need to verify and/or enter information from the warrant into the **Parties tab, Warrants tab** and ensure that **warrant documents are related to both the event codes and warrant tab**.

### PURPOSE

When a party fails to appear for a court hearing in front of a judge, or fails to appear on a criminal summons, and **Failure to Appear (FTA) in Court Warrant** is ordered by the judge. FTA Warrants should not be used when a party fails to report to:

- a specialty court,
- the probation office,
- to jail to serve time,
- Pretrial Services, or
- fails to appear for a Failure to Pay Summons.

## BASIC INFORMATION ON FAILURE TO APPEAR (FTA) WARRANTS:

FTA Warrants created in Odyssey must follow specific guidelines in order to show the correct event codes and reflect when a party fails to appear for a court hearing or fails to appear upon a criminal summons. FTA Warrants are entered through the **Warrants** tab or through the **Hearings/Courtroom Minutes** tab. FTA Warrants are tracked through the **Warrants** tab using the correct **Status** or disposition of the warrant. (See definitions under **DISPOSING OF AN FTA WARRANT**).

WARRANT EXTRADITION LIMITATION TO BE SELECTED BY JUDGE\*\*\* (choosing this option will leave checkboxes for the judge to select the appropriate extradition condition):

The State will extradite the defendant from:

[ ] Anywhere [ ] Anywhere in the continental United States [ ] Any contiguous State [ ] Within New Mexico [ ] Within the County [ ] Within the City

**\*\*\*Once the judge selects the extradition, the clerk must go back into the conditions in the warrants tab and chose the corresponding extradition condition.**

- I. Click on the “Status” tab
- J. Select the appropriate Location (for automated warrants, use NMSP – Electronically Submitted)

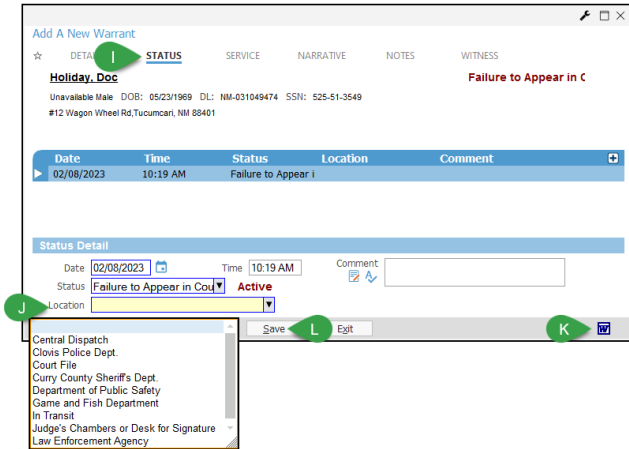

**NOTE\*\*\*** If the warrant will not be signed the same day it is printed, select “Warrant Printed - Unsigned” for the Status. The default Location will then change to “Judge’s Chambers or Desk for Signature”.

After the judge has signed the warrant, the status of “Failure to Appear in Court Warrant Issued” will need to be added, using the date the warrant is signed as the status date.

**\*\*\*For the automated warrant, remember to update the Location to “NMSP – Electronically Submitted.”**

- K. If merging the warrant from Odyssey, click on the “W” icon to bring up the form options OR
- L. If not merging the warrant form, click Save and continue on to Step 4

After clicking on the “W”, you may receive a message asking “Changes to this warrant must be saved before printing a warrant form. Do you want to continue?” Select **Yes**.

After saving the information, the **Select Document** box will open; select the appropriate warrant form to print:

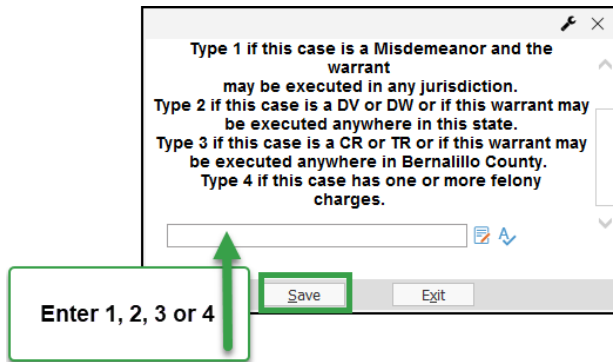

District Courts: **D-CR-BENCH WARRANT – GENERIC**

Magistrate Courts: **M-CR-9-212C-BENCH WARRANT1** or **M-JR-P-212B-JUVENILE TRAFFIC BENCH WARRANT**

Metropolitan Court: **M-CR-9-212 C BCMC ONLY FTA BENCH WARRANT**

**For Metro Court\*\***

After selecting the form **M-CR-9-212C BCMC ONLY FTA BENCH WARRANT**, a pop-up box (or prompt) will appear. The information entered into the prompt will determine the jurisdiction that the defendant can be arrested in.

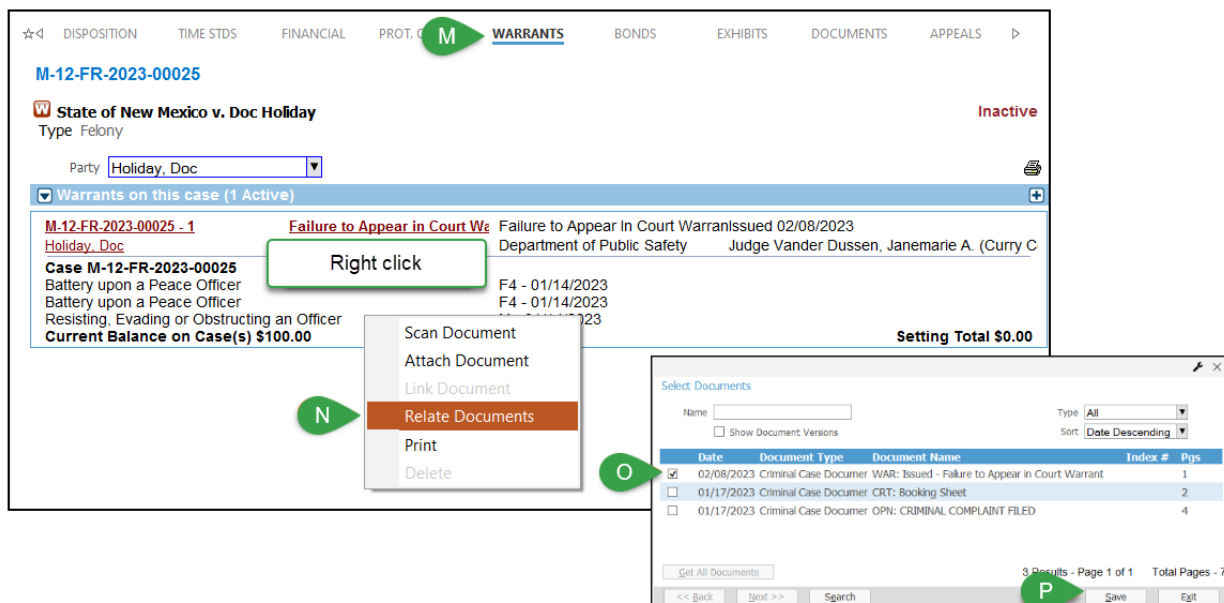

#### 4. RELATE WARRANT DOCUMENT

Once the warrant is issued (signed by the judge), scan, attach, relate or link the document to the warrant issued event code.

The warrant must also be related in the **Warrants tab**

- M. In the **Warrants tab**, right click on the 'FTA Warrant Issued' status
- N. Select **Relate Documents**. This will open the **Select Documents** window
- O. Check the box next to the Warrant Issued document
- P. Save

The next section in purple is for Automated Warrants. See **DISPOSITION OF AN FTA WARRANT** for instructions on how to inactivate an FTA warrant.

**FOR AUTOMATED WARRANTS:**

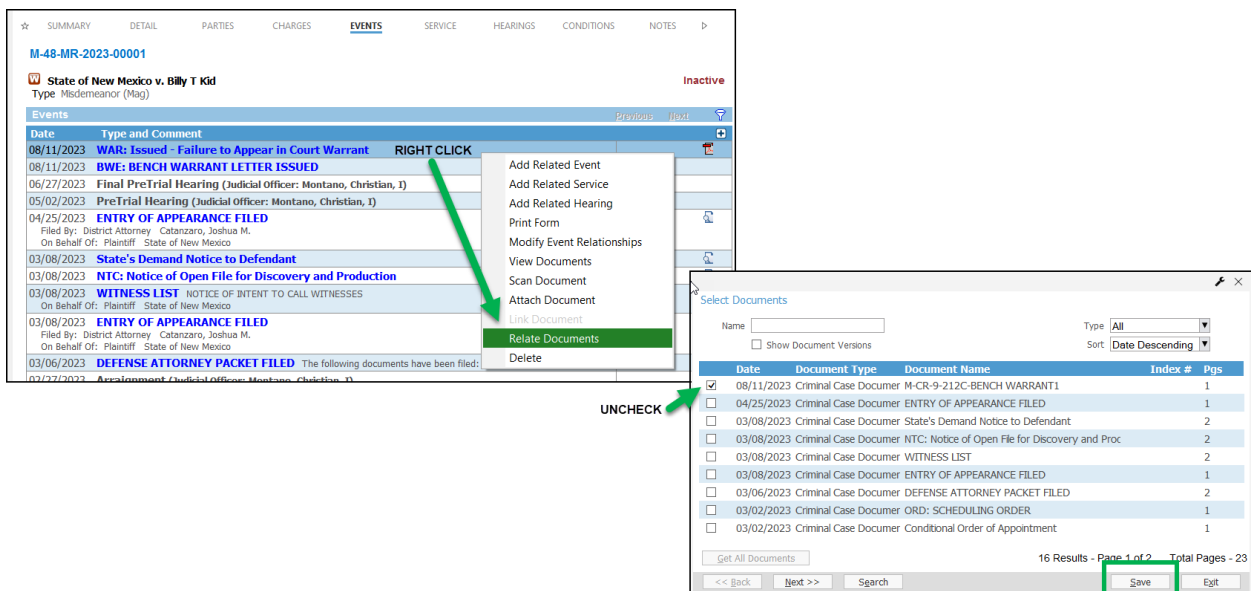

Once a warrant is issued, the court will receive an email either verifying the warrant was successfully submitted to DPS, or that validation errors were found. If the submission was successful, the comment 'e-sent to DPS' will appear in the Warrant Issued event code.

If there are validation errors, the errors must be corrected and the warrant resubmitted.

For **SAME DAY** corrections:

If the corrections only need to be made in Odyssey (warrant document does not change), correct the party identifiers and/or the warrant conditions. Then, in order to trigger the application, right click on the Warrant Issued event code and select 'Relate Documents'. **Uncheck** the box next to the warrant document and **Save**.

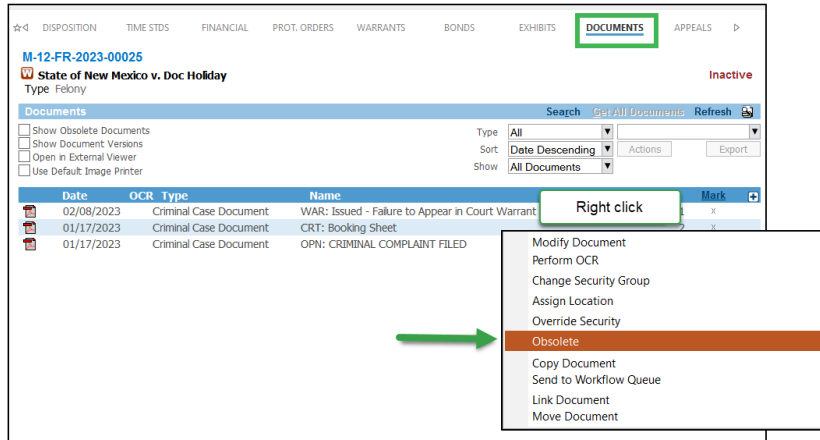

Right click again on the Warrant Issued event and choose Relate Documents. **Check** the box next to the warrant document and **Save**. If the warrant is successfully sent to DPS, the comments 'e-sent to DPS' will appear in the Warrant Issued event.

If the warrant document also needs to be updated, **OBSOLETE** the incorrect warrant from the documents tab and correct the errors.

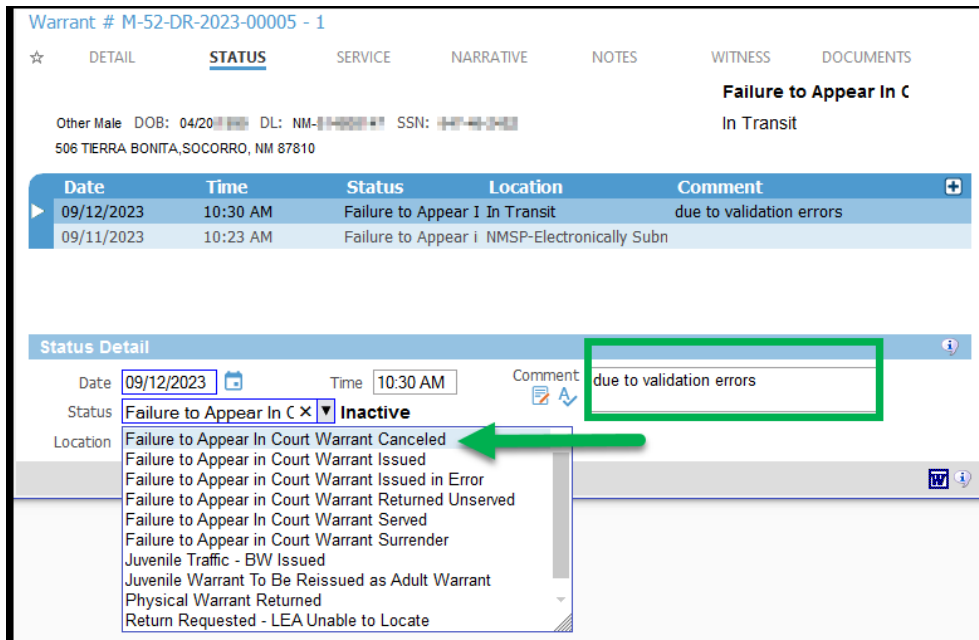

**\*\*\***District Courts may need to cancel the existing warrant and have a new warrant submitted according to their court’s local practice.

Create an updated warrant using the same warrant instance in the warrants tab (**DO NOT ADD** a new warrant). After the updated warrant is created and signed by the judge, relate the warrant document to the **existing** event *and existing* status in the warrants tab.

For **SUBSEQUENT DAY** corrections:

In the Warrants Tab, add a cancelled warrant status and in the comments section add ‘due to validation errors.’ Add the same comments to the cancelled event code.

1. For manual (physical) warrants: If the original warrant is returned:
  - H. Click on previously entered status
  - I. Click on the "+" sign
  - J. Select **"Physical Warrant Returned"**
  - K. Click **"Save"**

The screenshot displays a court case management interface. At the top, navigation tabs include DISPOSITION, TIME STDS, FINANCIAL, PROT. ORDERS, **WARRANTS**, BONDS, EXHIBITS, DOCUMENTS, and APPEALS. The main case information shows:

- Case ID:** M-12-FR-2023-00025
- Title:** State of New Mexico v. Doc Holiday
- Type:** Felony
- Party:** Holiday, Doc

Below this, a section titled "Warrants on this case" lists:

- M-12-FR-2023-00025 - 1** (Holiday, Doc): Failure to Appear In Court Warrant Issued 02/08/2023, In Transit, Judge Vander Dussen, Janemarie A. (Curry C)

A detailed view of "Warrant # M-12-FR-2023-00025 - 1" is shown, including a table of status updates:

Date	Time	Status	Location	Comment

02/08/2023	10:19 AM	Failure to Appear I		Department of Public Saf; Warrant updated due to validation errors

Two "Status Detail" pop-up windows are overlaid on the screenshot:

- Top-left window:** Shows Date: 02/08/2023, Time: 2:31 PM, Status: Physical Warrant Returned (Inactive), Location: Court File. A green arrow labeled 'J' points from this window to the "Return Requested - LEA Unable to Locate" option in the second window.
- Bottom-right window:** Shows a list of status options: Physical Warrant Returned, Return Requested - LEA Unable to Locate, Warrant Canceled, Warrant Issued, Warrant Issued In Error, Warrant Not in NCIC, Warrant Printed - Unsigned, Warrant Returned Unserved, Warrant Served, and Warrant Surrender. A green arrow labeled 'K' points from this window to the "Save" button in the bottom-left window.

**NOTE\*\***The served warrant document should be scanned, attached, linked or related to the Warrant Served event code

If the original physical warrant has not been returned, the court should make a request to law enforcement to return the warrant and if the warrant cannot be located, the court should enter a status of **“Return Requested – LEA Unable to Locate.”**

**Note\*\*\* (For some District Courts)**

- ✓ Because warrant event codes do not auto docket when a warrant status is entered, it is important to remember to docket the appropriate event codes so that case statuses are updated. Also, failure to docket FTA warrant events will affect the age of active pending cases and also the time to disposition.
- ✓ ‘Physical Warrant Returned’ does not indicate a disposed warrant, change the case status or affect the case aging clock, so when an FTA warrant is disposed of, one of the following events must be docketed as well:
  - Failure to Appear in Court Warrant Served
  - Failure to Appear in Court Warrant Canceled
  - Failure to Appear in Court Warrant Surrender
  - Failure to Appear in Court Warrant Issued in Error
  - Failure to Appear in Court Warrant Returned Unserved (District and Magistrate)

- Failure to Appear in Court Warrant Served on Booking Notice (District Court)

\*\*\*Refer to the Warrant Event Codes and Usage Notes Quick Guide for the different codes used in each particular court.

- ✓ A good practice to follow is to set up warrant reports that will show discrepancies in warrant statuses and events.
